

We Serve New York City

Project Renewal started more than 55 years ago as a 48-bed alcohol detoxification program at the Third Street Men's Shelter. Since then, we have expanded the breadth and depth of our services, and now reach clients at 21 locations with more in the pipeline. We focus on continuity of care and program integration, providing holistic support to New Yorkers experiencing homelessness to help them renew their lives, live independently, and attain economic stability.
